### 2.) change the yourdomain.com with whatever you want the to redirect to, eg your rotator with offers.

### 3.) **Important :** Depending on the tracking system you are using you need to place a tracking pixel so you know how many optins you're getting. It's usually right after the opening body tag where I show you in the picture, but you'll see in your software where to place it.

### 4.) Upload the image in the image folder if you have one, otherwise you can upload the folder as it is via cpanel or FTP ( go to public html and you'll find your files there.
